# Woodrow Wilson International Center for Scholars Digital Futures Project Congressional Cybersecurity Lab Private Sponsor Travel Certification Form – Pre Trip -Additional Responses

### 13. Briefly describe the stated mission of each sponsor and how the purpose of the trip relates to that mission:

The Congressional Cybersecurity Lab aims to educate Congressional staffers on technology policy issues critical to U.S. national security, as well as to foster bipartisan working relationships. The trip supplements the work of the program's six-week seminar series, providing fellows with an opportunity to gain first-hand understanding of some of the technology and policy questions discussed in the seminars. The focus of this trip is to gain a perspective on the future of cybersecurity issues, specifically those issues related to the proliferation of IOT devices, the intersection of cybersecurity and foreign policy, public- private partnerships, securing big data and innovation, amongst others. Field visits will include meetings with academics from University of California at Berkeley and the University of Washington, private sector tech companies such as Palo Alto Networks, Palantir technologies, Visa, Boeing, Amazon, and Microsoft, and government entities such as the DIUx.

Our goal is to promote an immersive understanding of policy issues on the legislative agenda, through exposure to the work and perspective of key stakeholders. The goal of the fellowship program is deeply rooted in the Wilson Center's broader mission and charter, to "...unite the world of ideas to the world of policy by supporting preeminent scholarship and linking that scholarship to issues of concern to officials in Washington."

The Wilson Center is the sole organizer of the trip. The William and Flora Hewlett Foundation provided a general grant to the Congressional Cybersecurity Lab with no requirement that the funds be used for congressional trips. Therefore, they have not directly nor indirectly earmarked funds for this trip. They have not played any role in choosing participants, selecting the destination, or designing the itinerary.

### 14. Briefly describe each sponsor's prior history of sponsoring congressional trips:

The Woodrow Wilson Center has organized multiple prior congressional trips: a staff delegation for fellowship alumni to Mexico, focusing on border security and the U.S.-Mexico bilateral relationship; a staff trip to Canada focusing on US-Canadian relations, security, trade and natural resources; three staff trips to New York City focusing on homeland security, and a staff trip to Colombia to focus on the FARC negotiations, a staff trip to Dublin focusing on cybersecurity issues, and a staff trip to Europe focusing on the future of the European Institution and NATO. The Wilson Center also sponsored multiple congressional trips through its Wilson Center on the Hill (WCOH) Program, which ended in December 2011. WCOH was a nonpartisan forum that focused on current issues related to international trade and security, sustainable development, and globalization. In its three years of existence, WCOH led two Member trips and two staff trips.

### 15. Briefly describe the educational activities performed by each sponsor (other than sponsoring congressional trips):

The Wilson Center is the official memorial to President Woodrow Wilson. In addition to carrying out public meetings and events, the Center hosts preeminent scholars and experts from around the globe who are researching topics of national and international relevance. The Center also welcomes school groups (both high school and college students) from all over the United States and the world to explore the Wilson Center and its Presidential Memorial Exhibition and Learning Center. A list of recent programs can be found on the Center's website at www.wilsoncenter.org.

### 18. Reason for selecting the location of the event or trip.

Silicon Valley was chosen as the cradle of the tech civilization. There we will have the possibility of meeting with representatives from across the tech/cyber industry: academics, private companies, the defense sector, and tech venture capitalists. In addition, we choose to visit Seattle, another tech hub, allowing us to visit tech giants Microsoft, Boeing, and Amazon, as well as experts from the University of Washington, providing a comprehensive and well-rounded study trip. On this trip we seek to provide insight into the intersection of cybersecurity policy and technology, the future of the cybersecurity industry with regards to the impacts of IOT, securing big data, securing innovation, and building capacity, inter alia.
